

Food Waste Compactor & Dewatering unit

Kumar Equipment's waste compactor is re-innovates the art of waste compactor, The product which separates food form oily water, grind the food waste, reduce the volume of the food waste up to 80-85%.

ADVANTAGES:

- The product shell is made of SS 304 .
- The product has the function of crushing and dewatering, the crushing size 3-5mm, Waste reduction up to 80%-85%.
- Grinding bin is made of imported alloy steel, stainless steel grinding components, corrosion- resistant and durable for heavy usage.
- Suitable for Food Waste Treatment Product with oil and water separation system.
- Solid-liquid separation system can be disassembled for cleaning.
- 200-250 Kg Capacity, Depending on volume of water contents in the food.
